A review of Trusting Trust, Internet Design and Cybercrime

Refer slide #29 of slide deck titled L1-Network-Security-Concepts and complete the following 3 tasks:
1. Provide a summary (200-300 words) of the article on "Reflections on Trusting Trust" by Ken Thompson
2. Provide summary (200-300 words) of how Internet (including it's security) was designed by watching Youtube talk by David D. Clark
3. Pick one of other 3 articles listed on the slide and provide 500-800 word summary of the article. In the summary, you also need to include in detail (max 300 words in the summary) about one of the black-market services, PPI services or cybercrime services discussed in the articles by referring other relevant material on Internet. Finally, suggest some counter measures (max 100 words) for individuals and enterprises like IITH to tackle cybercrime.

Note: Submit your response as a Google Doc (NO PDF) by crediting sources other than the base papers that helped in preparing your answers. It will be checked for plagiarism from Internet sources, Chat GPT, etc.
